

About Us

Automotive-Connectors specialized in supplying automotive brand producers in electric equipment components

The main part of our offer are high quality connecting systems used in LPG supplying systems,, wire harnesses and other devices

Automotive-Connectors aspiration is providing small producers as well as brand potentates with constant flexible supply

Flexibility in supply, high quality components and undeatable prices make Automotive-Connectors a perfect business partner

Products:

Our products are the highest quality automotive connectors which are used among other things in LPG and CNG systems

All our products are RoHS compliant

They are used by leading European producers of LPG and CNG systems

We offer more than 10000 connector patterns and mating terminals for them

- ▶ Terminal - pressed
- ▶ Compound Terminal - pressed
- ▶ Housing - Injection mold
- ▶ Compatible products

Elements of LPG & CNG kits:

MAP sensor cover

Sensor connectors

EFI connectors

Fuseholders

Accessories

Wireharnesses

Housing:

Housings offer by us are made of highest quality mixture of plastic

As equivalents they are in 100% accordance with patterns both in material and electromechanical way

We offer models with highest level of technological advancement

Fuseholders

Sealed connectors

Electronic Control Unit (ECU) connectors

Electronic Fuel Injection (EFI) connectors:

TOYOTA

HONDA

NIPPON DENSO

Ev1

Ev6

NISSAN

Terminals:

Terminals which we offer are made of different type of materials depending on customers requirements.

We also offer bi-material solution.

We offer terminals with full range of acceptable wire sections.

They are delivered in high quality collecting packings which enable efficient machine tightening on devices of world leading producers.

Wireharnesses:

Our EFI and sealed connectors are used in wireharnesses and LPG & CNG kits.

They are used in automotive branch including LPG and CNG branch.

They are used by leading European producers of LPG and CNG systems.

Head Office

Skwer Kościuszki 15, 81-370 Gdynia

sale@automotive-connectors.pl

Products validation:

- ▶ Nanjing Validation Test Laboratory
Full scale test facilities for
USCAR, MES, MDS, GB, GME
Certified by SGM
- ▶ Taipei Validation Test Laboratory
Full scale test facilities for
MES, NDS, Mitschubishi
Certified by Delphi & Nissan

Validation test in European Union:

- ▶ test of typical measurements
of connectors against mold deformation
- ▶ electromechanical connector resistance
and insulation test
